

How to Measure Pole Mounted Valances

- Pole Mounted Valances are sold as pre-set sizes in single units.
- Each style has a unique shape & size.
- We suggest to order 1 valance for every X " of window width depending on the style.
- As with the Drapery Panels, consideration must be given to the hardware the valances will be hung from. The window/wall width you'll need to cover and the extra length that clip rings will add to the valance.
